

## Tedex Smar Grafitowany

greases

### Product description

**Tedex Smar Grafitowany** is the calcium grease produced on base of mineral oil with viscosity 11 mm<sup>2</sup>/s in temperature of 100°C, including minimum 10% of natural graphite.

### Specifications and Approvals

PN-59/C-96153

ISO 6743/9:BAHA-2

### Physical and chemical properties – typical values

Tedex Smar grafitowany		
Kneading after penetration at 25°C	1/10m m	268
Dropping Point	°C	77
Water content	%	3
The structural stability, the amount of separated oil, not more than	%	5
The content of abrasive substances		do not contain

Above parameters are standard data, we reserve the right to change them due to technical progress

### Application

**Tedex Smar Grafitowany** is designed for lubrication:

- cars' springs,
- open gears, worm gears, screw threads exposed on corrosive agents, chains and other loaded friction surfaces,
- operating in range of temperatures between -200°C to +600°C

### Features

- water resistant.

### Industrial Safety and Fire-fighting properties

All safety information is included in the product's Material Safety Data Sheet, which contains detailed information concerning potential threats, safety pre-cautions and first aid measures, as well as information concerning the product's impact on the environment and disposal considerations.

### Storage and transport

**Tedex Smar grafitowany** shall be stored in closed containers, which protect it from moisture, water and mechanical impurities. It can be transported by means of road and rail transport, both drums and other containers it does not cause danger.
