GREASES

Tedex Machine Grease

Plastic greases

Product description

Tedex Machine Grease is a calcium grease produced by dispersing high molecular weight calcium fatty acids in mineral oil with additives increasing lubricating properties.

Specifications and Approvals

PN-68/C-96130

Physical and chemical properties – typical value

Tedex Machine Grease	2
Consistency class	2
Penetration after kneading, at 25 °C, 1/10mm	260-300
Dropping point, °C	85
Water content, % not more than	2,0
Free base content, %, not more than	0,2

Above parameters are standard data, we reserve the right to change them due to technical progress

Application

TEDEX Machine Grease is intended for lubrication of plain bearings in temperatures ranging from -10 to 60°C.

Usage properties

- resistant to cold water, good lubricating properties

Industrial Safety and Fire-fighting properties

All safety information is included in the product's Material Safety Data Sheet, which contains detailed information concerning potential threats, safety pre-cautions and first aid measures, as well as information concerning the product's impact on the environment and disposal considerations.

Storage and transport

Tedex Machine Grease shall be stored in closed containers, which protect the oils from moisture, water and mechanical impurities. The recommended storage temperature up to 40 °C. The oil can be transported by means of road and rail transport, both in bulk and in barrels – it does not generate danger.

Any information on the application of TEDEX's oils and grease can be obtained from:
